EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven Hultquist on 6/20/2005.

The application has been amended as follows:

- Cancel claim 67.
- In claim 61, line 2, insert "having an etch stop layer thereon," after "heterogeneous to GaN," and before "removing the heterogeneous".
- In claim 63, line 2, insert "wherein the one or more intermediate layers includes an etch stop layer" after "having one or more intermediate layers thereon;".

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The closest prior art is Akad (DD 224341 A1). Akad teaches a method of deposition an epitaxial layer of GaN on a substrate and removing a sapphire substrate. Akad also teaches a thin layer (some 10 angstroms) of boron nitride (BN) is used as a thin release layer between the sapphire substrate and the GaN

film (page 2 of the translation provided by applicant). Akad discloses using a 10 angstrom thick layer, which too thin to be used as an etch stop layer; therefore Akad does not teach or suggest growing a single crystal GaN over a substrate having an etch stop layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ceglio et al (US 4,870,648) teaches forming a boron nitride etch stop layer with a thickness of 10-200 nm (claims 10-12), which is 10-200 times the thickness taught by Akad (DD 224341 A1).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew J. Song whose telephone number is 571-272-1468. The examiner can normally be reached on M-F 9:00-5:00.
